

REMARKS

After receiving the above-identified Office Action, Applicant reviewed the files and notes that in submitting the above-identified filing as a Continuation of Application 09/434,792, it should have been (and apparently was) considered as a Request for Continued Examination in Application Serial Number 10/076,257. Accordingly, Applicant does not understand the basis for requiring a restriction since the application Serial Number 10/076,257 includes only one claim, namely Claim 25. For convenience of the Examiner, a clean and separate listing of the only claim existing in the application is set forth above.

It was not the intention of the Applicant to file a separate application containing Claims 1-24, as they have been the subject of various divisional applications, some of which have been granted as patents.

It is respectfully requested that the Amendment of June 14, 2004 filed in Application Serial Number 10/076,257 be entered and that that case be advanced to issue."

So that the record is complete, Applicant is also submitting a copy of the text of this document but with a heading that identifies it with Application Serial Number 10/638,063.

Respectfully

Harold Levine
